RETENTION

Four in five leave within a month.
The rest **stay for good**.

Retention collapses in the first month, then flattens near 15% and holds for two years — a small, durable loyal core.

of a cohort is gone by month 1 — the single intervention window.

~16%

the stable floor — the loyal core that never leaves.

Average decay · 2019 cohorts

VALUE x CHURN

Half the customers leave.
The money stays.

Churn is 45% by headcount — but the top 10% of customers drive 51% of revenue and churn just 6%. The value is sticky; the losses are low-value.

CHURN FALLS AS VALUE RISES · BY CUSTOMER SPEND DECILE

● Sum of churn_180 ● share of total value

Where Value Lives

51% of revenue.
6% churn.

The customers who matter most are the least likely to leave — the revenue base is safe.

What the data suggests

The 45% headcount churn **overstates revenue at risk** — most churners are low-value. Aim retention at **defending the high-value core** (small but 51% of revenue) and **converting the mid-value deciles** (6–8), where churn is meaningful and spend is real — not the low-value, high-churn mass.

SEGMENTS

A few customers carry the business.
One small group is walking out with the money.

Six behavioural segments (Recency × Monetary). Value, churn and size shown together — so each group maps to one action.

At-Risk		10.83	66.18	10.8%
Needs Attention		7.37	25.89	7.4%
One-Timers		4.77	73.67	4.8%
Hibernating/Lost		4.37	83.87	4.4%

SAVE

At-Risk — 66% churning

Valuable (11% of value) and leaving. Highest-priority reactivation — losing revenue now.

CONVERT

One-Timers

Valuable (11% of value) and leaving. Highest-priority reactivation — losing revenue now.

RELEASE

Hibernating / Lost

84% churned, 4% of value. High churn but low worth — don't spend to win them back.

**Champions & Loyal show ~0% churn by construction.* Recency defines both the segment (recent buyers) and the churn flag (silent 180d+), so high-recency segments are definitionally not-churned — a tautology, not a finding. The real churn signal is in At-Risk, One-Timers and Hibernating/Lost.
